

孩子学习困难的成因

Root Cause of Learning Difficulties in Children

孩子的课业总是无法顺利完成?

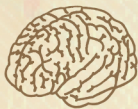

这是最令家长困扰又忧心的问题。卓越教育集团在教育的领域里不断的提倡一视一听一图像的概念,目的是要让家长们了解,唯有透过它才能构成学习的模式。我们期望家长们能够对“学习”有更深入的了解而不是一味寻求补习来解决孩子们学习的问题。

一视指视觉效应,它包含了视觉记忆、视觉辨识(辨认能力如:庆和庆)、眼球追踪以及视觉感知能力。

一听指听觉记忆。

一图像指右脑的空间记忆。

Are your children always having a hard time to finish their homework?

This is the most troublesome and worrisome issue for parents. Intelligent Education Group continually promotes the idea of using visual-hearing-image concept, main objective is for the parents to understand this is the only way to help construct the learning model. We hope parents can have deeper understanding of “learning” process instead of expecting tutoring as the main solution of children’s learning issue.

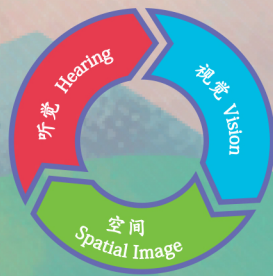

Visual refers to visual effects, it consists of visual memory, visual discrimination (e.g. b & d), eye-tracking and visual perception.

Hearing refers to auditory memory.

Image refers to the spatial image of right brain.

学习架构对应学业上 所形成的学习困难

Architecture of Learning Dealing with Learning Difficulties

卓越教育集团这些年致力在感官效应的教学领域里给予家长们最真切的分享。接下去几页是关于各个感官对应学业所形成的学习问题。我们希望家长们能够从中了解孩子学习缓慢的因素并给予最适当的解决方式。

In recent years, Intelligent Education Group is committed to sharing all of the information regarding sensory effects related to teaching. The following few pages are the various learning problems caused by the sensory process. We hope that parents can understand the reasons that contribute to the slow learning of children and give them the most appropriate solutions.
